Dear Lynn,

I appreciate all the time and concern you have shown me regarding American Stone quarry. I went to Wasatch County planning today and all the documents they have lead up to rules they have set up, but we couldn't find a conclusion that both parties agreed upon. Mike is the contact there and he is going to look into this further to see if the documentation we are looking for is there, but wasn't in the appropriate file. The two most important documents we found are the De Minimis letter from your division stating the type of crusher they are permitted, and a letter from American Quarries stating what their applications for the conditional use permit are. The noise level is stated to be less than vehicle traffic, so if they do intend to put a larger crusher up on top, this may affect those levels, as well as effect the state permit for the crusher. As per our discussion last week, Lon Thomas spoke with Vicky Bollesen and told her that he was going to install a crusher 4 times the size of the one he currently has up there, and has a permit for. She was told it was going to be brought up to the quarry this week sometime.

I don't know what else to provide to you since we have no final documentation from the county about the results from those 2001 meetings between Wasatch County and American Stone. I appreciate your time and concern, and I guess the only thing I can do is try and find out when the new crusher comes, so I can let both the county and you know of its arrival. Could you also please let me know of any outcomes, and anything else that I can do regarding this larger crusher and the noise.

Thank you,

Melinda Korologos
